SHEilds testimonial;

As a Health, Safety and Environmental manager covering several disciplines and engaging in contact with regulatory authorities very regularly, I felt I needed to enhance my professional status. After looking at various possibilities I decided to take the NVQ level 4 route as this suited my needs, allowed for work / study flexibility and provided me with the outcome I needed.

I investigated several methods of achieving NVQ 4 in H&S and found that SHEilds provided not only the outcome I needed but had the added benefit of being provided on-line.

Having phoned SHEilds and satisfying myself that I was capable of providing the required evidence I enrolled.

The initial briefings by phone and email set me on my way quite happily with the only problems arising being down to my lack of IT skills. This was overcome with some helpful discussions on one or two occasions with the staff at SHEilds. So I actually improved in not only my safety professional status but also in my IT literacy. Thanks for that!

The process of getting through each module was identified by the support team and their guidance made the provision of the evidence clear and very easy. As each module was sent through I felt the speed of marking and feedback was very good, which I really appreciated as the last thing I wanted was to be starting and stopping constantly.

I never felt under pressure from SHEilds to at any point but did feel that should I require support it was close at hand. I did not need to attend the regular meetings in Hull but again felt this was a very useful support tool that many students would benefit from.

All in all I felt the process from start to finish to be easy to follow and would encourage others looking to improve their professional status to take the SHEilds NVQ 4 route without any hesitation.
