

NEBOSH Health and Safety Management for Construction (International) Certificate

Study Time

This course has 156 hours of study time required.

Course Access

You have access to this course for 12 months from the date of purchase.

Who it's for

This course is aimed at construction personnel and managers with health, safety, and welfare advisory roles.

Overview

The NEBOSH International construction safety certificate is designed for the wider market (outside the UK), and will enable learners to become competent in making construction activity safe, while complying with national and regional legislation.

Upon completion of this NEBOSH Health and Safety Management for Construction (International) course, learners will have the skills to assist their organisation in meeting their legal construction safety obligations. Learners will also understand how to identify and control construction site hazards and advise on risk management.

What can I do?

Completing the NEBOSH Construction (International) Certificate equips you with global competence in construction health and safety.

This certificate enables you to confidently oversee safety compliance, manage risks, and promote worker well-being on construction sites worldwide. You will gain the skills to excel in international construction projects and ensure a safer, healthier environment for all.

*NEBOSH recommends that learners taking this certificate level qualification be at an IELTS level 6 or above.
