Who is this for?

This course is for managers, supervisors, safety representatives and health and safety advisors working within process industries.

Overview

A globally recognised qualification designed for those working within process industries at supervisory level and above.

Studied online, this NEBOSH Process Safety Management certificate is suitable for people working in industries, such as oil and gas, chemicals, plastics and pharmaceuticals.

Upon completion of this HSE Certificate in Process Safety Management course, learners will have the skills to assist their organisation to understand the difference between “process safety” and “personal safety”.

There are no prerequisite entry requirements for the HSE PSM certificate, however it is recommended that candidates have an underpinning knowledge of health and safety, preferably a nebossh qualification..

Did you know?

Becoming qualified will enhance your resume and benefit your company. Some businesses will only use the services of companies that are compliant with particular recognised standards.
