

Who is this for?

Managers working in a senior position that have responsibility for developing and applying strategic health and safety and those that are looking to expand maintain their expertise and skills.

Overview

This qualification is aimed at higher level managers who sit as part of the senior management team and have a more strategic role within an organisation.

Delivered entirely online, this NVQ Level 7 Diploma will build on a learner's experience and knowledge and allow them to demonstrate the senior level skills, required to pass this course. The assessment is completed through a collection of evidence during the learner's day-to-day working activities and submitted through the Learning Assistant e-Learning platform.

As an international qualification, there are no geographical restrictions on who can take the course or its' application. Additionally, CMIOSH membership option is available with completion of the individual professional development (IPD), though this is entirely at the discretion of IOSH.

Did you know?

The entire course is 100% online and has no exams. Instead assessment is based upon the aforementioned evidence collected during the working day together with written reflections, assessor lead assignments and professional discussions with an assigned assessor.

The course cannot technically be failed either, only prolonged.

There are no fixed entry requirements, however a level 7 NVQ or diploma qualification is recommended.
